CYF-5 FLEXIBLE CYSTOSCOPE
An evolution in smoothness with a refined tip design.
SMOOTH INSERTION WITH EVOLUTIONTIP

Evolutiontip for smooth insertion
The Evolutiontip is a tapered tip that allows for easier insertion. This new design enables smooth entry without sacrificing image quality or treatment capabilities, making the CYF-5 an ideal scope for transurethral procedures.

Evolutiontip and matching angulation direction
By matching the angulation direction with the tapered scope end, insertion is facilitated more smoothly.
Excellent observation capabilities

· **Improved image quality.**
  Newly designed optical system allows for better resolution, especially in the peripheral view.

· **Up 210°/down 120° angulation.** Easier observation and treatment around the ostium and bladder neck.

· **120° field of view.** Both ostia can be observed simultaneously.

Miniature light source

The rechargeable miniature light source with LED (EndoLED WA91502A) transforms the CYF-5 into a portable fibrescope. Perform high-quality examinations anywhere within your medical facility.

Ergonomic design and aspiration function

· **2.4 mm channel.** The large 2.4 mm (7.2 Fr) channel allows effective perfusion with 6 Fr instruments.

· **Aspiration.** One-handed control of the aspiration function makes it easy to keep the field of view clear.

· **Ergonomic design.** Angulation can be locked, allowing single-handed control of the instrument while maintaining the same view.

Specifications

**Optical system**
- Field of view: 120°
- Direction of view: Forward-viewing
- Depth of field: 3–50 mm

**Insertion section**
- Outer diameter of distal end: 11.7 Fr (4.6 mm x 2.6 mm)
- Outer diameter of insertion tube: 16.5 Fr (5.5 mm)

**Instrument channel**
- Diameter of inner channel: 7.2 Fr (2.4 mm)
- Compatible Olympus EndoTherapy accessories
- EndoTherapy accessories for 6 Fr (2 mm) channel
- Minimal visible distance: 5 mm

**Bending section**
- Angulation range: Up 210°/down 120°

**Total length**: 700 mm
